## Sentiment of Tweets about Top 10 Stories

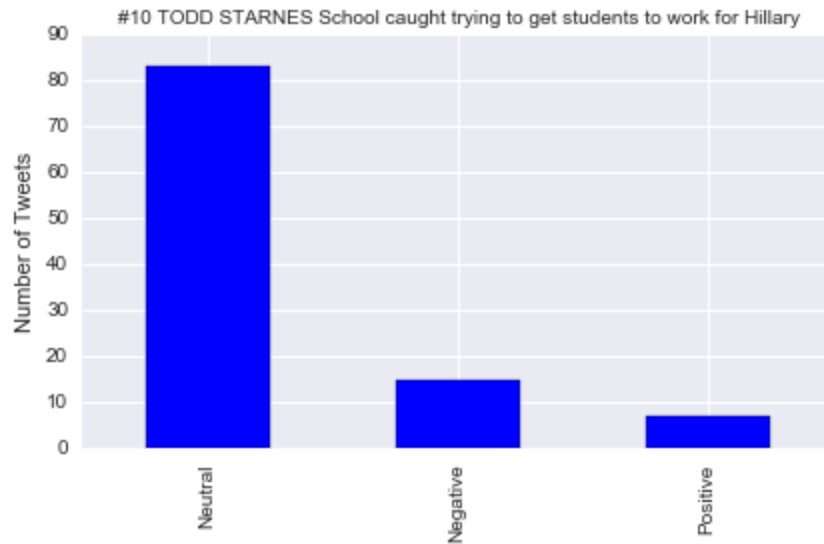

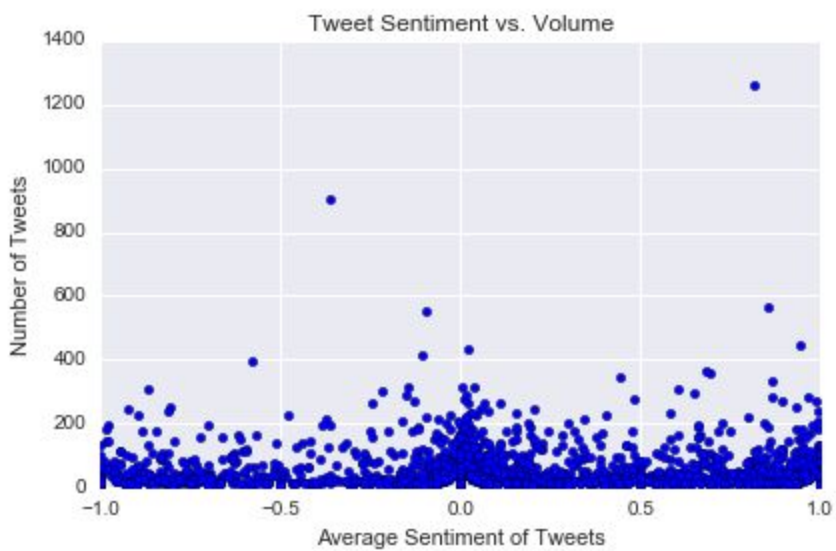

**Is there a Correlation b/t Avg. Tweet Sentiment of Story and Volume?**

Doesn't look like it, Pearson correlation also doesn't return.

---

## NOTES

### Comparison to Milkman's Corpus:

6,956 articles total, timespan Aug 30-Nov 30 (2008) [**Us**: 6,496]

Subset of 2,566 manually coded

### Quality Checks:

- I sampled 100 random unmatched articles to look for any clear patterns-- do not see anything sticking out (I have attached those stories in a CSV).
- Will include caveats of this pipeline in methodology section.

### Questions:

- Should we include Kasich followers?
- Should we look at those who follow more than 1 candidate?
